When it is recalled, and few forget it long, that we are living over powder magazine which one drunken man can explode, it is discouraging-to see the great number of drunkards staggering about tonight and the com parative few who have already gone to sleep in the gutters. Perhaps this s a case of where there is safety in numbers.

It is cheerfully admitted, in view of the straits which the government finds itself reduced to, in appreciation of the emergency which may arise at any moment, that the Diaz government has made all the response it could, and more than was expected, to the notes of the American Ambassador and the German Charge d'Affaires, demanding the protection of their country men, isolated by the advance of the insurgents on Cuernavaca.

Two hundred and five soldiers were this morning detached from the slender force now defending the seat of government and were started in armored cars over the mountains to Cuernavaca. They were in com of Col. Huerta, from whom I understand no news has been received since their departure. There is apparently little hope of their getting through. SEARCHLIGHTS GUARD CITY.

Tonight field pleces are in position as usual and the cavalry patrols are making their tireless circuits of the city. Practically the whole garrison and every gendarme and rurale is on foot or horseback and at the end of every street or avenue, where it dies away into the surrounding country, huddle a handful of soldiers. Exceedingly powerful searchlights have been gotten into position today

at four commanding points and they are lighting up the environs as clear as day. One is an Contreras, another at Tizapan, a third sheds light from Penon and the fourth is somewhere behind Chapultepec. With all these precautions taken, it seems unlikely that an attack from utside would have the advantage of a surprise, but should an attack orig-

nate in the city it is difficult to say what would happen or how it would The conservative opinion here tonight, however, is that unless President Diaz and Gen. Occupants of a Pullman car who were robbed on the Oaxaca express by insurgents last evening when near Puebla, reached here this morning and were quite angry at their misadventure until they heard of the fate of their fellow travelers near Cuernavaca. United States Wants no More Territory; the Suspicions Are Unjust.

Cardinal Gibbons Hopes An-Glo-American Treaty

Sert that there is not, in the whole length and breadth of the United States, among its people any desire for territorial aggrandizement and that its people as a whole will not permit its government, if it would, to take any steps in respect to foreign peoples looking to a forcible extension of our political power.

KNOW WHAT WAR IS.

"We have had wars and we know what they are. We know what responsibilities they entail, the burdens and losses and horrors, and we would have none of them. We have a magnificent domain of our own in which we are attempting to work our destiny and show to the world success in popular government and we need no more territory in which to show this. But we have attained great prosperity and great power. We have become a powerful member of the community of nations in which we live and there is, therefore, thrust upon us necessarily a care and responsibility for the peace of the world in our neighborhood, and a burden of helping those nations that cannot help themselves, if we may do that peaceably and effectively."

The President was particularly interested in a speech by Dr. J. A. MacDonald, editor of the Toronto (Canada) and Globe, a warm advocate of reciprocity.

"If that arbitration treaty between your country and England is ratified," said Dr. MacDonald, "the name of William Howard Taft will be remembered in world history so long as man loves peace. United Shoe Machinery Company in the Light.

Congressman Says It Makes for Cheaper Shoes.

Manufacturers Say It Prevents Reductions.

(ASSOCIATED PRESS NIGHT REPORT.)
WASHINGTON, May 2.—The declaration that a "trust" grips the entire shee manufacturing industry of the United States was made today before the Senate Committee on finance, which began hearings on the Canadian reciprocity bill. Manufacturers from the Middle West told the committee they were practically at the mercy of the United Shoe Machinery Company of Boston. It was suggested that a report of the hearings be transmitted to the Attorney General.

The principal spokesman for the shee manufacturers were William d'Oench of St. Louis. With him were manufacturers from St. Louis, Chicago and Grand Rapids, Mich. An incidental reference to a failure to reduce the duty of brass wire used in the manufacture of shoes led d'Qench to say that the "trust" made it impossible to [ASSOCIATED PRESS NIGHT REPORT.]

the "trust" made it impossible to

that the "trust" made it impossible to buy brass wire abroad.
"Why don't you buy all your machinery abroad, then," asked Senator Simmond of North Carolina.

In reply the shoe manufacturer referred to the 45 per cent, duty which stood in the way.

In reply to Senator Smoot the witness said the royalty charged by the shoe machinery "trust" in less than a par would be sufficient to buy the English machinery outright.

The Senator contended that under these circumstances the duty should not prevent the American manufacturer buying European machines.

Mr. d'Oench declared that the shoe manufacturers could not get all of their machinery in England and to get part of it from the American concern they were required to buy all.

Mitton S. Florsheim of Chicago told the committee the American manufacturers had been obliged to sign a swenteen-year contract and that no other shoe machinery manufacturing company would enter the field besses it could not find purchasers.

wenteen-year contract and that no other shoe machinery manufacturing company would enter the field because it could not find purchasers.

While the shoe manufacturers were emplaining to the Senate Committee Representatives Weeks of Massachusets was declaring in the House that a "beneficent monopoly" by one corporation of such machinery enabled it to lesse the machines at a 'very low rate to American manufacturers.

The testimony was almost simultaneous Mr. Weeks offered his statement in the House in opposition to the free list bill. The Senate hearing, while ostensibly on reciprocity, has been thrown open to a discussion of the free list bill.

Mr. Weeks used an array of shoes, krogans, boots, slippers and sandals tillustrate his argument against the Democratic measure.

brogans, boots, slippers and sandals to lilustrate his argument against the Democratic measure.

The lecture on shoes drew the largest audience of members that has listened to tariff talk, in days.

There is no combination in the shoe haustry," declared Mr. Weeks, "nor is the leather or tanning industry, There is no trust or monopoly consected with these trades."

Mr. Weeks asserted the United Rates Shoe Machinery Company by its cheap leasing of machines, had presented a general combination among manufacturers of shoes.

report will come up in the Senate tomorrow and a fight is expected.

The report was unanimous, but there was a specific understanding that it should not be construed as an indication of the committee's views on the merits of the case. So particular were some members on this point that they insisted on a written statement that the action indicated only that if another investigation should be undertaken, provision would be made for the expense.

It was also agreed that the recommendation of the committee today should apply to any investigation or dered, whether under the La Follette resolution providing for a special committee on Privileges and Elections.

The first fight in the Senate on the resolution will come when an effort is made to have it transferred to the Committee on Privileges and Elections for a report.

Senator La Follette will antagonize such a motion and contend for action by the Senate without further committee references. Senators who at the last session voted in favor of Lorimer's retention of his seat, hold that the Senate should take no further action until the inquiry in Illinois is concluded.

vestigating trend of Congress took a wide range today. Inquiries into the affairs of the United States Steel Corporation, the American Sugar Re fining Company and the American Woolen Company were placed on the programme of the Democratic House; the shoe industry was under fire, and a Senate Committee on Expenses paved the way for a re-investigation of the charges against Senator Lori-

Common Sense

Being wholly made of the active medicinal principles extracted from native forest roots, by exact processes original with Dr. Pierce, and without the use of a drop of alcohol, triple-refued and chemically pure glycerine being need instead in extracting and preserving the curative virtues residing in the roots employed, these medicines are entirely free from the objection of doing harm by creating an appetite for either alcoholic beverages or habit-forming dangs.

Examine the formula on their bottle-wappers—the same as sworn to by Dr. Pierce, and you will find that his "Golden Medical Discovery," the great shoot-purifier, stomach tonic and bowel regalater—the medicine which, while not recommended to cure consumption in its advanced stages (so medicine will do that) yet sost sare all those external conditions of head and threat, weak stomach, torpid liver and bronchial troubles, weak lungs and hang-on-coughs, which, if neglected or badly treated lead up to and finally terminate in consumption.

Take the "Golden Medical Discovery" is finst and it is not likely to disappoint you if only you give it a thereugh and fair trial. Don't expect misracles, it won't do supernatural things. You must exercise your patience and persevere in its use for a reasonable length of time to get its full benefits. Defense Unable Then to Force Prosecution.

The return of W. J. Ford, assistant District Attorney, from Indianapolis and the scenes of the arrest of the alleged dynamiters, the McNamara brothers and McManigal, brought new activity into the local situation. Ford hurried from the train to a conference with the District Attorney, which last-ed until nearly 7 o'clock last night. When it ended, it was with the un-derstanding that it will be resumed this morning and definite action de-

with the Times Building disaster.

Such a proceeding will eliminate the necessity of turnishing the defense with a copy of the grand jury testimony. It is believed the District Attorney wants to perfect this testimony before it is divulged.

A proceeding before a committing magistrate requires the presentation of testimony by the prosecution to such an extent that the magistrate is justified in holding the accused in bonds to the Superior Court. The prosecution would be relieved of this introduction of testimony only if the defendants walved examination, a most unlikely thing.

DELAY JUSTIFIED. DELAY JUSTIFIED.

Appearances, however, indicate that the District Attorney has been waiting for Ford's return to fully advise himself as to the proper preliminary steps,
Arraignment before Judge Bordwell

justification for the delay already caused.
Fredericks will confer with Judge Bordwell' this morning and perhaps arrange the time for arraignment. It may be this afternoon, but the greater probability is that it will be tomorrow. It is also likely that no public announcement of the hour will be made.
Ford, on his return, was met by two members of the District Attorney's detective force, William Bright and C. C. Ong, who accompanied him until he got rid of his suit case. Ford said he had taken it home and not to a mafety deposit vault. He said he had traveled from Chicago alone and had had an uneventful journey. No attempt had been made to molest him. On the way from Indianapolis to Chicago, Ford said there were four men whose appearance alarmed him, but they proved to be disinterested in his affairs.

It was supposed that he brought important evidence in his suit case. It was not large enough to hold much, and Ford declared that it was rich only in soiled linen. But the two detectives showed earnest soficitude for Its custody.

Ford says the charge of kidnaping against him and Burns and others is a mere act of retaliation and one that cannot result in more than annoyance. He says the steps taken were all legal, and the hue and cry about kidnaping is to modify public sentiment, if possible.

He declined to discuss the evidence in his possession or the policy of the prosecution, but he paid Superintendent Hyland and Captain Holtz, of the Indianapolis police a high compil-

His answer was representative of the spirit in which the association has followed the investigation of the dynamite outrages and the ends of justice it aims at. It follows:

"Thanks for your telegram. The people of California demand and will give a fair and impartial trial to the men now under arrest here. We believe in law and order and adhere to the great American principle of considering a man innocent until he has been proven guilty by due process of law no matter how serious the charge against him may be."

Twentieth Annual Meeting—Report of Librarian Shows Growth.

POMONA, May 3.—The twentieth annual parish meeting of St. Paul's Episcopal Church was held last evening at the church, and plans for the lot south of the church were considered. There were reports of the different church and Sunday-school organizations which showed marked progress during the past year under direction of the rector, Rev. Franklin U. Burbe. The election of evestrymen resulted as follows: Messrs. T. R. Trotter, J. P. Benson, S. D. McIntyre, Mel Campbell, F. H. Osier, Joseph Mullen, A. W. Pooley, C. F. Thompson and Rev. F. U. Bugbee.

The regular monthly meeting of the board of library trustees was held at the library last evening and the continued growth o fthe institution was indicated by the report of the librarish. Miss S. M. Jacobus, which showed a present registered membership of 7580 and a total number of 19,320 volumes in the library.

run down by the detectives employed on the case. It appears from the statement of a printer connected with the artair that the matter was intended for an April fool's joke and that the author did not realize the outcome of his silly hit. More developments are expected by those employed in the matter, which hit many people over the head of an innocent party and brought discredit and ridicule to the door of one not responsible.

A movement is on foot to stop the unsightly scenes that are witnessed on the late cars coming to this place, and heading many mountain climbers. Owing to the popularity of the Mount Wilson climb an undestrable element has crept in and commutors and others have been obliged to put up with considerable annoyance from rowdies.

Nany complaints have been entered with the railroad officials and the authorities of the town.

Much activity is being felt in the resity market here and many demands are being made for vacant cottages. Considerable building is going on and there has been an increased demand for residential, sites.

**CHAPTER 47** 

Top Degree of Perfection Sought in Gas Service.

A LITTLE GAS-LIGHT NOW AND then is relished by the best of men. The same men, and ALL women, also fancy a gas range, a gas grate, a gas furnace, a gas water-heater, and other conveniences that go with this indispensable utility. There are so many ways of using gas, and so few ways of getting along without it.

The time long since passed in Los Angeles when it was necessary to point out the advantages of gas over coal and wood, kerosene and gasoline, tallow-dips and pine-knots. The main consideration of the Los Angeles Gas and Electric Corporation now is to bring its service to the highest point of perfection; to aid the nearly 90,000 consumers of its product to obtain the best results from the use of gas; to remove every cause for complaint-in fact, to make Los Angeles the ideal "gas city."

To these ends, the company maintains at all hours an emergency department which responds to every call for assistance and for information; it also conducts an Investigation Department which carefully examines into all reported shortcomings.

Patrons are invited to use the telephone freely, to write, or to call in person at the main office when anything seems wrong with the gas.

Although the low price of the Kurtzmann might be considered an inducement, it would not be so unless that Piano possessed musical quality to a degree.

It is a low-nriced Piano which you can afford to buy—a Piano your children can use advantageously, just because tone, touch and action are so perfect.

The Public Schools of Los Angeles have adopted the Kurtzmann as the standard by which all Pianos purchased must be measured. In recent specifications for twenty Pianos they called for Kurtzmann or equal. In fact, this Piano is a favorite in schools and institutions, where the Piano used must be musically perfect and, at the same time, able to withstand constant use.

In thousands of Southern California homes, also, you'll find the Kurtzmann—giving true musical every owner.

The Board of Public Works, the engineering department, the contractor and the people of Fifth street, between Mott and Bell streets, are all in a stew over a street paving job.

C. H. Curtiss got the job of paving the street, under the Hammon act, which requires pay in advance; the people objected and thought they could supercede the action of the city, by making a private contract with Curtiss to do the work on easier terms. The contract was made and Curtiss went ahead and did the initial grading of the street, when he suddenly quit and hauled away his material without constructing curbs or gutters, and the street department began to flood the property body, in a way connected with the street, is left half done.

HINDS ON RECIPROCITY.

Congressman Asher C. Hinds of Maine, who now sits in Tom Reed's place, made, in the United States House of Representatives, on the 15th of April last, an exceedingly able speech on the reciprocity treaty with . He treated the subject on broad lines and his argument was an analytical

and philosophical discussion.

The farming interests in this country have not always received in legislation such ade-quate consideration as their importance both actual and relative-demanded. The first Napoleon said that "a great army always travels upon its belly." The same may be said of an industrial army. The larger portion of the food supplies of cities and towns is raised by the farmers of the vicinage; while those engaged in manufacturing and commercial industries find customers for a portion of their wares among the farmers who supply them with food. Ninety-one and a half per cent. of the agricultural and manufacturing products of our country are consumed at home and only 81/2 per cent. goes abroad for a market. The warp and the woof of our garment of empire are woven whose frame are on the farm and whose shifting shuttle is in the factory. The farm ers are more than one-third of the people their farms and farm products in dollars is

The people who dwell in cities often con the industrial, political and social life of the nation than the farmers. Congressma Hinds quotes the statement of a brilliant alogist of Abraham Lincoln, who said that "Horace Greeley thought himself a bigger man than Abraham Lincoln because he lived in a bigger town.

ngressman Hinds says truthfully and fully: "The dwellers in cities cannot forcefully: disassociate their interest from that of the farmers. Diminish the purchasing power of the farmer and you diminish by so much the prosperity of every city and of every laborer, clerk, merchant and banker within its limits."

If the product of Canadian farms shall come into this country free of duty, that will reduce the price that the farmers of the frontier States receive for their farm products and so reduce their power to purchase the product of the factories and furnaces. Equally, if the duty on manufactured goods should be taken off from European importations, the workers who make such goods in this country would have their

Reciprecity is not reciprocity unless it is nutual between all the parties affected by Where "the mutuality of feeling is all on one side" there is no reciprocity. pending reciprocity treaty with Canada was wittily described by Congressman Hinds as

follows: "The manner in which this bill distributes its supposed benefits and its undoubted hardships violates mankind's fundamental idea of justice and equity. Since the dawn of time, through all my-thologies and religions, man has ex-pressed his inborn idea that to those who have the suffering and self-denial should come the bliss of the better world, the peace of the Elysian fields, the joy of the golden streets. That is real reciprocity. But this bill intro-duces into that ancient, instinctive idea of equity, a new principle; that one class of citizens is to have the sacrifices, while another class enjoys the re wards. The dairymen of New York and Ohio are to tread the earthly pathway of self-denial, and in reward the makers of barbed-wire fencing are to roam the Elysian fields [laughter;] the wheat farmers of the Dakotas are to keep the long vigil of unrestricted competition. and in return the automobile makers of Detroit are to speed over the streets of keep watch and watch with death on the banks of Newfoundland are to surrender their market, and in return the ecticut clock makers are to set un their timepieces in the realms of blis where a thousand years are but as Michigan is to have the troubles of Lazarus, but the maker of harvesting machines is to rest his head on the bosom of Abraham. [Laughter and applause.] One class sows that another may reap.

and you call it reciprocity. Reciprocity means that the protection afforded to our farmers on our Canadian bor-der against Canadian competition be swept away. The excuse for this is that it will re duce the cost of living to the worker in the cotton mills. By the same reasoning why not reduce the cost of living to the farmer providing for the admission of cotton cloth from Canada free of duty? For Canada might import manufactures of cotto free of duty from Manchester, England, and if these were admitted by us from Canada free of duty the result would be that the cotton mills of New England would be closed or the wages of their operatives re-

Canadian farms is England. In 1908 Canada sent us 23,000 dozen of eggs, while she sent to England 1,200,000 dozen. In the last five years Canada sent us 100,000 pounds of butter in a year, while she sent to England pounds of cheese a year, while she sent to sent to us less than 20,000 barrels of apples. but in the same year she sent to England more than 1,000,000 barrels.

The Canadian farmer meets in England the competition of the world, for England Duke's son, cook's son, son of a belted earl, gives admission free of duty to agricultural products, and ocean and lake freights are so low that the food necessary to sustain a man for a year can be carried from New

"He told me, one night, that bitterness seemed almost inseparable from politics. He instanced Bulwer Lytton's candidacy for Hertford, when his wife came to the town, mounted the platform, and delivered a ven-omous speech against her husband. It was this speech that caused the son of the illmated pair to write: Who came to Hertford in a chaise,

Some twelve years ago Mr. Hammond was tried and sentenced to be hanged for taking part in the Jameson ow a part of the British Empire, after a fight for their liberties by the Boers which won for them the admiration of all lovers of freedom.

The Briton loves his American conof freedom. Great Britain, promoted by the late King Edward, dealt generously with the conquered Boers, and they now enjoy self-government as part of united South Africa. Doubtless the Boers do not harbor any hard feelings against Mr. Ham-mond, and might even be willing to sit, as guests, at his luxurious banquets. The great convention of the National Educational Association, in session July 11, 1902, at Minneapolis, Minn., unanimously adopted the following as part of their Declaration of

"It is apparent that familiarity with the English Bible as a masterpiece of literature is rapidly decreasing among the pupils in our schools. This is the direct result of a conception which regards the Bible as a theological book merely, and thereby leads to its exclusion from the schools of some States as a subject of reading and study. We hope for such a change of public senti-ment in this regard as will permit and en-courage the reading and study of the English Bible, as a literary work of the highest and purest type, side by side with the poetry and prose which it has inspired and in large part formed.

A., Headmistress of Manchester High School for Girls, and lecturer on education at the University of Manchester, also member of the Manchester City Council's Education Committee Council School Council School Committee. The writer says: easy to dogmatise positively about American education, the more one studies the less one seems to know. But even a superficial study of it helps one to understand home better, to see what is best in English education, what must at all costs be pre-served. Chief of these good things is that simple religious education, which is given in all types of English public schools, in one have held firm, in spite of the difficulties and anomalies it has entailed in a free and heterogeneous modern community. AMERICAN PRINCIPLES.

BY DORA OLIPHANT COE. Two fundamental principles (the meaning would not be strained if the word were spelled "principals") of American govern

ent are: Free speech-by which we mean not only the privilege of expressing our convictions, but the right to be heard in that expression;

The rule of the majority-which needs The rule of the majority—which needs no explanation further than to say that the statement presupposes and includes a gracious submission on the part of the minority. In the excitation of the movement for universal suffrage one fact becomes more and more apparent. Those who are in favor of the cause refuse to listen with tolerance to arguments for the other side, crying, as did one of our noted ministers at the Ministerial Union, "There is no other side." Then, just as this man did, when any one promulgates views which are against woman suffrage, the suffrage element reads, talks, laughs and gives no heed to the re-

This ascription of impure motives to an honest opponent is un-American. And the intolerance of a great part of the suffrage element is an earnest of a not very desirable future should the amendment carry.

In all deliberative bodies the minority yields to the majority vet while the sum yields to the majority, yet, while the sup-porters of woman suffrage admit that they are the minority, they clamor that, "If just one woman wanted the ballot and all the others did not, still it should be granted Since the majority of the women of Cali-ornia believe that the privilege of voting means the responsibility to do it, and to do t wisely, knowing all the whys and when fores, and since this majority feels that there are responsibilities enough upon its shoulders already, responsibilities which the ballot cannot affect, is it not the part of the

Educate the anti-suffragist, if she appear to hold her position because of non-intelligence, but educate her by arguments which go below the surface. It is barely possible that her viewpoint has been broader than that her viewpoint has been broader than that of the average woman, and she may have seen life and its problems from so

A spirit of tolerance toward an opponent, a recognition of the conventions of deliber-ative bodies, a remembrance of the rights of others and of the courtesies due to them in assemblies will go far toward proving that women are not too much ruled by im-pulse and personal feeling to take a thoughtful, unbiased part in the politics of our

## Two of the Latest Conceits of Fashion in Silkdom

—Coronation Twill and Crepe Meteor are two of the latest creations of the master weavers. The fad has received much favor in European and Eastern fashion centers and soon the drawing rooms and promenades of the Los Angeles select will be featuring these charming silks. We will describe them more

Coronation Twill

—The Coronation Twill will probably receive the most attention as an out-of-doors material, as its body and finish make it the ideal goods for tailored or street suits. We have the Coronation Twill in 2 styles—the solid black and the navy and black glace. -36-inch all-silk serge, in black, at \$3.00 yard. -36-inch, all-silk serge, in navy and black glace, at \$3.00 yard.

Also a 27-inch serge, black with hairline stripes of white, very dressy, at \$2.50 yard.

Crepe Meteor

Tunic and drape gowns, made of Crepe Meteor will possess a grace and richness as well as an individuality in coloring, giving the whole an air of exclusiveness so desired. If you wish a soft, clingy material for summer gown-wear be sure and ask to see Crepe Meteor, the next time you visit Coulter's silk department.

The defendants are oil men connected with corporations operating in Kern county. It is stated that the authorities have been having considerable trouble looking after the interests of agricultural homesteaders whose rights are being violated by those in quest of oil.

The oil msn will put up a strong fight in defense of what they consider their rights in the matter, and the government is just as determined to protect homestead rights. If there are valuable deposits under these lands there is another way to get at it, it is stated by the legal representatives of the government.

Depository: FIRST NATIONAL BANK, Los Angeles, California

OFFICE OF THE COMPANY 715 Story Bldg, Sixth and Broadway, Los Angeles, Cal.

THE PROPERTIES OF THIS COMPANY comprise 480 acres located in the Big Horn Basin, Wyoming Oil Fields, and are held under government location, free and clear of all incumbrances, being subject to neither lease nor royalty.

Geologists who have examined this field are of the opinion that it is one of the best fields for high grade oil and gas yet undeveloped. That the United States government shares this opinion is best shown by the fact that since these lands were acquired the government has withdrawn from entry all oil lands in Wyoming heretofore available.

That the quality of the Basin oil is of the very highest grade is shown by the following analysis made by the Professor of Chemistry of the University of Wyoming:

Gasoline ...... 20 to 25% Light lubricating oil .... 5 to 10% Kerosene ...... 2 to 4% Coke and loss ..... 4 to 6%

Professor Wilbur C. Knight, the most prominent geologist in the State, says: "The petroleum from this field is remarkable for the very light oil which it contains, and it will be very valuable as a source of gasoline and kerosene. It has a specific gravity of

Among the 30 wells in the Big Horn Basin reported to have a production of 50 to 200 barrels per day, three are within a mile of the properties of this company. Most of the wells in this district strike the first sand at a depth of about 600 feet, and it is stated the deepest passed through seven oil sands and is claimed to have the largest production in the State—600 barrels per day.

What greater depths will show is, of course unknown, but that the results will prove favorable is the unanimous opinion of those who have followed the progress of this field to date. The average cost of drilling is small, being about \$5 per foot, and the average depth is 1000 feet.

average depth is 1000 feet.

It is the intention of this company, should the developments warrant, to erect its own refinery, as the large percentage of gasoline and kerosone in the Big Horn Basin oil makes it as valuable as the Penhsylvania oil, which always stands at the top of the market, and there will be a profit of approximately \$4.00 per barrel in refining it. THE BOARD OF DIRECTORS comprise some of the best known oil men in California. Major H. M. Russell, president and general manager, has long been an Independent Oil Operator in this State, and stands at the very forefront of successful oil operators.

Mr. Ralph Martin, vice-president, is perhaps one of the most highly regarded chemists connected with the refinding interests on the Pacific Coast.

The treasurer, Mr. F. H. True, is president of the Economy Fuel Company and is widely and favorably known throughout the State.

The field manager, Mr. J. M. Colon, has had an extended experience in the Mid-

Mr. George W. Russell is a successful Los Angeles business man. For the purpose of developing the property 100,000 shares of the par value of \$1.00 each, are now offered for subscription at 10c per share. A further 100,000 shares will be sold at 15c per share, after which no more will be sold except at prices commensurate

Taking into consideration that the properties are free and clear of all incumbrances, that there is an unusually large acreage all in virtually proven territory, and that a well in this district producing 200 barrels a day is alone considered worth between \$400,000,00 and \$500,000,00, it will be readily seen that this is an offering of exceptional merit, and as applicants for shares under the present offer participate on the same terms as those taken by the directors of the company, all become equal partners in proportion to their investment. their investment.

While drilling for oil is essentially a speculation and should so be considered, given a property in a good district, well located, and with competent management, there is every reason to anticipate success. As this company possesses all these qualifications, and as the directors invite you to join on the same basis accepted for themselves, the

and as the directors invite you to join on the same basis accepted for themselves, the bona fides of the company cannot be questioned.

As this offering of shares is likely to be greatly over-subscribed, applicants from out of town should telegraph their reservations and let their remittance follow by first mail. At any price under 50c a share there is no better purchase in the whole market today, for if only average results are obtained, the stock should command a large premium before the end of the current year, and as many dollars per share as it now sell for cents is within range of possibilities. Applications may be made on the attached form and forwarded with a remittance to cover, to the company's office, where temporary receipts will be issued to be exchanged later for stock certificates.

Applications will be made in due course to list these shares on the Los Angeles and San Francisco Oil Exchanges. To the Directors of the Wyoming Oil and Refining Company

EVERYTHING READY.

Final details for The Times Tour to Lakeside were completed at an important meeting held at the offices of Referee Frank Garbutt yesterday morning. Prominent automobile dealers and all the tour officials were present.

The rules of the Automobile Association of America were distributed to the contestants and others present and the plans for the tour were ratified and the schedule one of the fastest ever and as swift a one as the Gildden tour, was ratified. The revised 1911 rules are ready and can be had today.

Referee Garbutt presided. Every phase of the touring contest was thrashed out. The women can drive but cannot enter cars. The rules cover each important point and were agreeable to each automobile owner.

Attorney Edward G. Kuster, representative for the contest board of the Lakeside and back again.

Miller Retires to Bench After the Fourth Inning.

Schafer Makes Angel Debut and Does Well.

BY OREY OLIVER.

Los Angeles, 9; San Francisco, 4 Schafer, the Vernon cast-off pitcher, made his first appearance for the Angels today a few hours after he had been signed by the Los Angeles team and easily beat the Seals, 2 to 4.

He was pitted against Miller and both of them started out at once to pitch the fence ball. This kind tickled the batsmen to death and they began pitch the fence ball. This kind tickled the batsmen to death and they began to bounce the ball off the fences without loss of time. There were no less than nine two-horse swats out of seventeen hits and that's going some. Miller could not stand the pace and after the locals had made five runs in the second inning and ten men had been to bat. Mohler handed Miller to the bench in the fourth and took a chance with Browning. This bird didn't do much better for the locals sapped him for enough to make three runs with and won so easily that some policeman should have pinched them for robbery.

The game dragged on the bottom and after the locals had made five runs in the second inning little developed to enthuse the fans, for that one inning was all that was needed. Yon don't hear many hilarious cheers when the score is 5 to 0 and as the Angels continued to make runs with great celat it was only a question of how many they would get.

It was the best game of the season for long hits in the shape of doubles for nine two-horse hits shows that they are sousing the ball. With their usual inconsistency the fans began to yell for help for some one as soon as the pokes began to bounce off the fence. Things got so hot for Miller that he had to chase himself to the bench at the end of the fourth.

Young Browning took his place and was sorry of it for the locals cracked him for a lot of swats and rolled in a lot of easy runs. There was no beattiff the Angels and when one man could not crack the ball another one did.

AVALANCHE BEGINS.

AVALANCHE BEGINS.

Metzger started the second with a single to left and Dillon and Grindle doubled to left. Then Schafer was passed, Akin singled infield any was safe at second on Bernard's fielder's choice to Mohler, which the units called safe. Daley popped to Mohler but Howard singled to center and it is easy to guess with all this pounding how the Angels made five runs. Ten men batted that inning.

The Seals got their first run in the fourth on Weaver's double. Tennant's out at first and Melchoir's sacrifice fig. The locals got that run back lither half of the fourth on doubles by Moore and Daley.

The Seals got two more in the fifth on a single by Vitt, a double by Moore and Daley.

## LAST SIEGE OF HARD WORK.

Both Fighters Lighten Exercise After Hard Training.

Kilbane Shows Much Class and Real Pullman Punch.

Betting Was 2 to 1 on Young Rivers Yesterday.

BY J. ALEX SLOAN.

ohnny Kilbane and Joe Rivers, the principals in the big boxing produc-tion scheduled for Vernon next Saturday afternoon wound up their strenu-ous sieges of training yesterday and from now on until the hour of the fight will content themselves with light work, to keep their weight down. PHILADELPHIA, May 3.-Boston No two boxing experts ever looked in better shape for contesting an honor in the ring than these boys. They have trained faithfully and ob-served every rule laid down by their for extra bases. Tenny, for Boston got five hits out of five times up managers and regardless of who wins Saturday the fans are assured a bat-

I put in yesterday afternoon in Kilbane's camp and I was more than re-paid for my trip to Jack Doyle's train-ing quarters, for I saw the little Cleveland fighter at his best and that means about as good as any 122-pound fighter has ever been. He boxed, wrestled, punched the bag, skipped the rope and did everything else that a puglist usually does on the final day of hard work previous to a

And the one thing that Kilbane im And the one thing that kilbane impressed me most with was his punch. In the previous training sessions I have witnessed the little fellow content himself with boxing and tapping his opponent lightly. Yesterday he tore into Louis Rees and any time he cared to he landed a blow that shook the frame of the lightweight until Jimmy Dunn, his manager, called him off.

Kibane has taken rather seriously the report that has been going the rounds regarding his lack of a punch. The fact is the little fellow has just as good a sting as any of the 122ders in the country, and he can

pply it to the anatomy of the other ellow with either hand. Kilbane further backs up his punch claim with a list of fights that in-clude many knockouts. He has won over the Pullman route about as often as any embryonic champion ever has and Saturday he expects to end the buttle with Rivers before the twen-tleth session of mixing via a knock-

out.

There is no question of Kilbane's superiority over his opponent in ring generalship and science. He knows and anticipates the other fellow's actions much better than most fighters do and he is constantly figuring out how he is going to bewilder his opponent into making a foolish move.

Young Rivers will be the busiest little fellow that ever stepped into a ring at Vernon if he tries to outbox Kilbane. And furthermore if he ever loses his head in the fast exchange of punches, feints and jabs that Kilbane is preparing to deliver he will lessen his chances of winning greatly.

CLEVER BOXER. Kilbane is one of the cleverest fel-lows the ring has ever produced, in breaking out of a clinch. He has a peculiar way of twisting around the peculiar way of twisting around the other fellow (after the manner of a dog chasing his tail, and then fiying off on tangent, landing a terrific jab at the instant of parting.

Other fighters have tried the same thing to bewilder their opponent, but no one has succeeded so well as the Cleveland boy. It is such things as these that will upset Rivers's attack if it is weakened at all.

Kilbane's best wallop is a straight of the such that will upset the such that will upset the such that will be such that will be

if it is weakened at all.

Kilbane's best wallop is a straight punch started from the shoulder and generally delivered when the other fellow is off balance. He also has a good uppercut, which seems to be effective from all angles.

Whether he will be able to slacken Rivers up with these two effective lows, providing he doesn't succeed in unbalancing the Mexican, is a question that no one can answer. No other fighters, who have faced Joe, have been able to stop him in his dash to victory, but none of his opponents have possessed the class that Kilbane does.

RIVERS FAVORITE.

The betting yesterday was at odds of 2 to 1 on Rivers and there was little Kilbane money to be had. However the supporters of the Cleveland boy are holding backgand looking for all the odds that they can get. You can't blame them for this as they realize that there will be more coin than they can cover on the Mexican anyway.

Around Grenewald's today it was claimed the odds' would go as low as 10 to 4 before the battle starts Saturday.

10 to 4 before the battle starts Saturday.

While Kilbane was entertaining a large crowd of fans at Vernon, Rivers was putting in his final telling blows of training at Venice. The Mexican worked nearly two hours, including 50 minutes on the road. He also boxed five rounds with Leonard Lauder and took on Mike Fusco in a rough session of wrestling.

I expect to put in today with the little Mexican and will go into detail as to his physical condition and his chances of winning Thursday morning. Kilbane's record beginning when he turned professional is as follows:

SAN FRANCISCO, May 3.—[Exclusive Dispatch.] Thompson, another southpaw, essayed to beat the Commuters today and while it wasn't his fault that Wolverton's men acquired a four-run lead at the outset, the pitcher was anything but blameless for the later runs that came chiefly on Oakland hits. O'Rourke sent Fitzgerald in as an extra shift but he was as wild as his predecessor had been ineffective and there were more tallies.

Mahoney's home run over the right

as wild as his predecessor had been life.

Mahoney's home run over the right field fence, was the only thing that, as aved the Senators a shut-out and the score wound up to 1 in favor of the trans-bay delegation.

Sacramento didn't have a chance against Tylei Christian, who pitched winning ball all the way. Two of the four hits were bunched in the third inning, but one man had been forced in between sind when Van Buren came two out and only a man perched on first base. Magnert drove out a long single. Coy tried to sacrifice and O'Rourke, to whom the ball bounded, to booted it in the most approved style. Pyt also tried the sacrifice hit. Dulin fought the ball straight at Lerchen. There was plenty of time to tag the Wolverton at third. Maggart hit a play but the acting shortstop threw was out to third but Coy scored on the base. Mitze fanned.

aggregation would undoubtedly have won.

It will be a difficult matter to choose a captain for the Los Angeles Cricket Club this year who will take as much interest in the welfare of the club as did Bamford last season.

The Santa Monica team will put in a strenuous practice at the nets on Sunday afternoon. Wickets will be pitched at 1:30 o'ckock.

Among those present at the meeting last evening were the following: P. J. Higgins, F. C. Stocker, J. F. W. Allan, Capt. John B. Nicholson, E. H. Wilkes, D. Jamieson, H. F. Eliot, C. I. Sweet, A. R. Mitchell, Capt. Leslie T. Peacocke, C. F. Egan, A. R. Yorston, H. Lewis, A. H. Collins, P. J. Tomkins. Other members of the clubare: Mayor T. H. Dudley, C. C. Le Blas, P. J. Dudley, R. H. Larritt, C. Santa Monica has won the Dudley cup twice and only need to win three games to cinch the trophy for all time. The Los Angeles Cricket hub has a very strong team this ar so that if the challenge is accepted some very interesting cricket will be witnessed this season.

Last year T. D. Bamford never failed to put his strongest eleven in the field against the champions, and, although his men were beaten, they

although his men were beaten, they never gave in, but played all the harder. Twice they nearly beat the beach team. On one occasion they hit up nearly 200 runs in a single innings and had not catches been muffed at critical stages of the game the local aggregation would undoubtedly have won.
